

# COMPLIANCE

Drive global compliance for stronger governance and improved performance

Rivo Compliance is an end to end compliance management solution for regulations, corporate policies, reporting frameworks and registers of contractors or assets. It helps you break down lengthy, highly complex documents into manageable obligations and requirements, which can then be assigned to teams or individuals.

Using Rivo will help you:

- ✔ **Manage regulatory compliance locally and globally**
- ✔ **Automate the management and administration behind compliance**
- ✔ **Manage compliance for any part of your business regardless of industry**
- ✔ **View your obligations locally and globally at a glance**
- ✔ **Highlight non-compliance hotspots**
- ✔ **Implement corrective actions to tackle non-compliances**
- ✔ **Drive efficiency gains by increasing visibility of workloads and avoiding duplication of data collection**

*Throughout the business, Rivo has encouraged employees to take more responsibility for Health & Safety at their individual levels, assisting them in prioritising and managing required actions. The system has exceeded our expectations, as proven by a recent evaluation which gave it a 100% satisfaction score.*

**Louise Briggs**, HR Director, Stone Hardy

### Make sense of complex regulations

You can quickly break down national or local regulations to individual, actionable obligations and requirements to help you understand at a glance what you need to do to become or remain compliant.

### Embed accountability in your organization

We've made it straightforward to assign ownership to each and every obligation that makes up your regulation requirements. Doing this means you can reinforce a culture of accountability.

*Rivo is an effective tool that helps us to comply with an ever increasing number of Health & Safety regulations. Easy to install and simple to use, it helps me achieve Health & Safety compliance and protect our employees' safety at work. It has been tailored to meet our specific needs and we are very pleased with the results.*

**Helen Moore**, Safety & Environmental Manager, TruckEast

### Monitor compliance performance

Identify underperforming areas of your business using geomaps of non-compliances. Then use other Rivo applications such as Audits & Inspections and Actions & Remediation to establish the underlying issues and address them.

### Consolidate your compliance

Rivo helps you understand and manage all your compliance obligations from one central source. This ensures managers and directors of each function (e.g. legal, HR, Finance, Operations) have full visibility of the compliance obligations on their teams so they can allocate resources effectively.

## Define easy to monitor registers

Rivo Compliance enable users to define registers of contractors, people, assets, hazardous substances or other entities. Each of these entities can have actions, risks, incidents, documents, audits or inspections assigned to them to drive compliance through visibility and control.

## Bring clarity to compliance

Understanding what everyone's role is within compliance will help encourage stronger overall governance. With Rivo you can always be completely clear on how a regulation obligation is being handled, and by who.

### Our apps are built for performance:

- ✔ **99.9% uptime and central secure cloud storage of your data**
- ✔ **Multi-platform support (including mobile) so you can manage compliance anywhere**
- ✔ **24/7 total support by phone or email as standard, so we're always here to help**

## Improve operational efficiency

Use Rivo Compliance to identify and remove any overlaps in data collection to ensure each piece of data is collected once and then used multiple times as needed.

# About Rivo

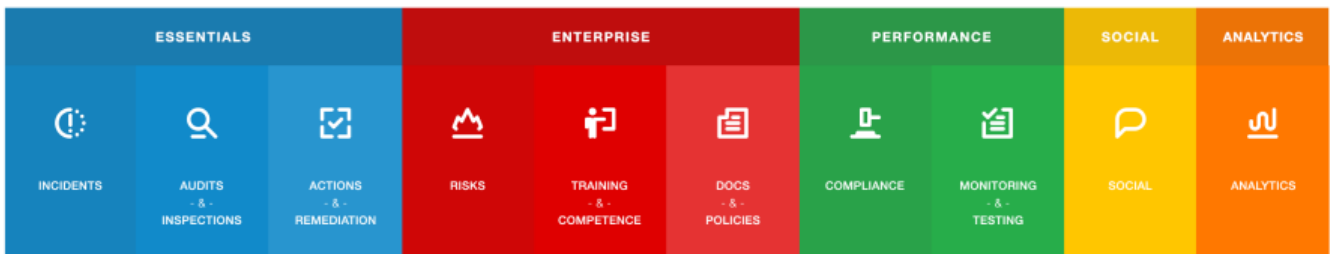

At Rivo, we've built market leading applications that transform how EHS and risk is managed. No matter the size of your organization, how many sites you have, or where they're located, our apps will help you automate repeatable tasks, engage your employees and deliver razor sharp insight. We have over 180 clients across 86 countries, and our apps help them protect people, assets, environment and profits in their companies.

Rivo is recognized in the Gartner Magic Quadrant for Operational Risk Management, the Gartner Magic Quadrant for Environmental, Health and Safety Management Systems and is a Red Herring Top 100 Winner for disruptive software.

Compliance is just 1 of our 10 applications. All our apps work seamlessly with each other to help you build the most effective EHS platform for your organization.
