

MONITORING & TESTING

Integrate, monitor and consolidate
to make your big data, smart data

The Rivo Monitoring & Testing application takes the pain out of data collection and monitoring across your organization. Our app will integrate with any equipment or device with an API so you can automatically record, monitor, calculate, analyze and report on emissions or other environmental impacts and remain compliant.

Using Rivo will help you:

- ✔ **Collect data from almost any source**
- ✔ **Use charts to view data in real time, in a format that works for you**
- ✔ **Trigger an automated alert when a parameter exceeds limit values**
- ✔ **Automatically turn raw data into insightful KPIs**
- ✔ **Identify trends and figure out what's driving them**
- ✔ **Aggregate data for compliance or voluntary reporting**

“

We chose Rivo because we were getting a good management platform and a strong company with the right structure and right values. The cost of change for moving from one platform to another is really huge – training, data to be migrated, processes that need to be implemented. We needed to establish a long-term partnership with Rivo – not just a solution for a temporary problem.

”

Joao Silva, Head of Corporate Environment, Sonae Sierra

Automatic data collection

We've saved you huge amounts of time and effort by making sure Rivo can be integrated with other data sources. There'll be no need for duplicated effort, Rivo can manage all your data under one roof.

Painless manual data input

For those times when you do have to input data manually, we've made that a smooth process too. Our forms will be pre-populated with key information such as your name and location, to save you typing.

“ With Rivo we saw the opportunity to get a tool that could answer our sustainability requirements. We use Rivo for a variety of purposes but specifically with Monitoring we can ensure we have a total grip on the environmental, energy and wider sustainability metrics in our business. That's enormously pivotal for us to manage sustainability. ”

Joao Silva, Head of Corporate Environment, Sonae Sierra

Streamline and standardize datasets

Different sites will inevitably collect data in different units, especially where you're a multinational organization. Rivo's Monitoring & Testing application can reduce the risk of errors by automatically processing the conversions to standardize these datasets.

Automatically calculate KPIs

Rivo can be set up so the raw data you collect is automatically processed to calculate metrics or KPIs. You'll be able to save time and effort as well as reduce the risk of embarrassing calculation errors.

Collect & aggregate data

Monitoring & Testing is all about complying with regulatory obligations. Rivo has been designed to help you aggregate the data you're collecting to help you see at a glance if you're meeting local and national obligations.

Identify problem hot spots

We visualize your data to help you understand it at a glance. Powerful tools such as geo mapping help you identify problem hot spots and drive performance improvements in different locations.

Our apps are built for performance:

- ✔ **99.9% uptime and central secure cloud storage of your data**
- ✔ **Multi-platform support (including mobile) so you can so you can monitor any environment**
- ✔ **24/7 total support by phone or email as standard, so we're always here to help**

Alert the right people every time

The automatic notifications in Rivo help you alert the right people in your organization and escalate any situation as necessary. This is important to help you take fast, appropriate action if something unusual does occur.

About Rivo

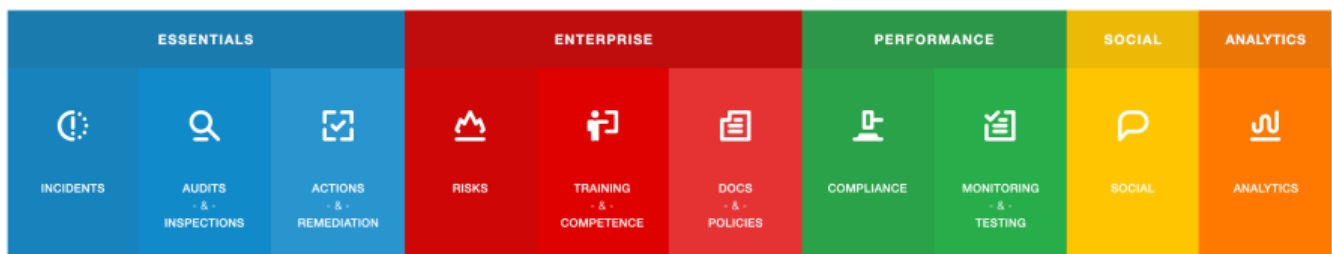

At Rivo, we've built market leading applications that transform how EHS and risk is managed. No matter the size of your organization, how many sites you have, or where they're located, our apps will help you automate repeatable tasks, engage your employees and deliver razor sharp insight. We have over 180 clients across 86 countries, and our apps help them protect people, assets, environment and profits in their companies.

Rivo is recognized in the Gartner Magic Quadrant for Operational Risk Management, the Gartner Magic Quadrant for Environmental, Health and Safety Management Systems and is a Red Herring Top 100 Winner for disruptive software.

Monitoring & Testing is just 1 of our 10 applications. All our apps work seamlessly with each other to help you build the most effective EHS platform for your organization.
